

ABSTRACT OF THE DISCLOSURE

A component may comprise one or more integrated circuits and a component
5 package to which the one or more integrated circuits are coupled. The component
package has a bottom comprising a plurality of conductors for providing signal
connection to the one or more integrated circuits, a top to which the one or more
integrated circuits are coupled, and a plurality of sides. At least one of sides includes at
least one power pad for providing a power supply voltage to the one or more integrated
10 circuits. At least one of the plurality of sides includes at least one ground pad for
providing a ground to the one or more integrated circuits.
